	dropped on a concrete floor from a height of 1-meter.

6. CONCEPT OF UNIT

The difference between the concept of unit "Pascal" and the one of unit "µbar" can be explained as follows. In calibrating the sensitivity of ECMs,

The sensitivity is manifested differently according to as the unit is "Pascal" or "µbar".

That is, the sensitivity will be increased by 20 dB in the usage of unit "Pascal".

Example:-60dB (0dB=1V/µbar) =-40dB (0dB=1V/Pa)

7.SENSITIVITY STANDARD TESTING

7.1 SENSITIVITY

7.2 REQUEST:

The tolerance of sensitivity is not over +/- 3dB to the standard microphone.

7.3 TESTING WAY:

- 7.3.1 Testing microphone with the standard operating condition.
- 7.3.2 Put the microphone and standard microphone to face the sound output place (speaker), the distance from sound output to microphone & standard microphone is 50cm. And keep the center distance 5cm between each other to ensure the sound pressure change should be keep in +/- 1dB.
- 7.3.3 Keep the output sound pressure in +/- 1dB from the speaker. (Tested by standard microphone)

7.3.4 The sensitivity of microphone is getting its output voltage when sound output keeps in

1000Hz & 1Pa.

7.4 Testing Condition

In Normal Weather

Environment Temperature : 5 ~ 35°C

Relative Humidity : $45 \sim 85\%$

Air Pressure : 86 ~ 106Kpa

In Arbitrate Weather

Environment Temperature: 20 +/- 2°C

Relative Humidity : $60 \sim 70\%$

Air Pressure : 86 ~ 106Kpa

Address: ROOM 1313 – 14, BLOCK A, HOI LUEN IND. CTR., 55 HOI YUEN ROAD, KWUN TONG, HONG KONG TELEPHONE: (852) 3465 7633 FAX: (852) 2385 6988

8. REGARDING THE SOLDERING OPERATION

MIC is a kind of very sensitive components for temperature and static impacting because there is a FET and a vibrant diaphragm , and FET is destroyed by strong heat and static ; Diaphragm is destroyed by strong heat。 If the operation is unsuitable or protect bad during the soldering process , it will affect MIC function and even destroy , So pay attention the following request when soldering :

8.1. Solder temperature and time

- 8.1.1. Suggest Iron of constant temperature;
- 8.1.2. Suggest lead-free soldering temperature range 320°C±20°C (external soldering temperature of Iron needle);
- 8.1.3. The tual temperature of the user is according to PCB layers and soldering way to adjust soldering temperature.
- 8.1.4. Ldering skill: soldering time of single point is within 2 seconds; Don't continue soldering same mic (please repair soldering once badly after cooling it)
- 8.1.5. Belongs to normal phenomenon that the sensitivity of the microphone change 0.5dB to 1dB within stipulating soldering temperature and time range.
- 8.1.6. If soldering temperate of the mic increase and time prolong, Sensitivity will have a big change, and even destroy inner structure, performance.

8.2. Soldering Quality

The soldering point can't leave sand hole or empty hole after soldering. (sand hole or empty hole will affect sensitivity and performance), continuous soldering phenomena.

8.3. Static protecting

Electric iron, test machine work stand, soldering tool must effectively connect earth. The operator must wear ring of resisting static.

8.4. Heat scattered defending

- 8.4.1. Using heat scattered tool, Choose Alor Cooper, Please refer the following drawing
- 8.4.2. The heat scattered tool of user, whose shape need according to actual the position of soldering product and space to design or increase blow air tool for scattering heat.

A good package will help Mic. on using normal transportation. Please pay more

attention to prevent humid, shake, sunlight and heavy press.

9. TEMPERATURE CONDITONS

9.1 A good package will help Mic. on using normal transportation. Please pay more attention to prevent humid, shake, sunlight and heavy press.

9.2 The full packed Mic. Should be store at warehouse in $-25 \sim +70^{\circ}$ C and the relative humidity not bigger than 90%. The warehouse must keep constant temperature, without acid or any other poisonous gas, and not caused any influence from strong magnetic field.

9.3 Storage Temperature Range : -25°C ~ +70°C

Operating Temperature Range: -20°C ~ +60°C
